EDUCATION

Expected in 05/2027 **Bachelor of Science: Computer Science**

Southern Illinois University, Edwardsville - Edwardsville, IL

I am currently studying Computer Science at Southern Illinois University Edwardsville

- Member of the John Martinson Honors Program
- Dean's list Spring 24' and Fall 24'
- Provost Scholar

PROJECTS

AI Job Site Web Scraper – Using RapidAPI and the OpenAI API in Python, I developed a web scraper

that collects job data from Indeed and formats it into CSV and JSON files. The program then parses a given resume using the BeautifulSoup library, generates vector representations of both the job data and the resume with the OpenAI API, and calculates cosine similarity scores between them. Based on these scores, the system identifies and ranks the jobs that best match the candidate's resume for optimal alignment.

Personal Training Website – Developed a soccer training web application using HTML, CSS, and SQL, featuring full Admin CRUD functionality for managing users, sessions, and training content. Designed a responsive and visually engaging interface while implementing secure database integration to dynamically link user data and maintain data integrity. Focused on delivering a smooth user experience, secure authentication, and efficient data management through a well-structured backend and intuitive frontend design.

SKILLS

- **TESTING AND VALIDATION**, API integration, Scripting languages, Pentaho Data Integration, Problem-solving, Object-oriented programming, Software debugging, Programming languages: Java, C++, SQL, Python, JavaScript, Teamwork and collaboration

EXPERIENCE

05/2025 to Current **ETL Programmer Intern**

National Information Solutions Cooperative – Lake Saint Louis, MO

- Collaborated with team members to troubleshoot coding issues and optimize performance.
- Developed and optimized SQL queries to enhance database performance.
- Assisted in data extraction, transformation, and loading processes for reporting purposes.
- Engaged in learning new programming languages and tools relevant to ongoing projects.
